- 57 mm alphanumeric receipt and audit
- Fast, silent printing
- 5,000 Items Price Look Up Memory
- Simple to use

Option of flat keyboard

SMART ECR SYSTEMS THAT DO MORE – COST LESS
GELLER ELECTRONIC CASH REGISTER SYSTEMS

At the forefront of retail technology since 1957

Big system features for the price of a basic ECR

The SX-580 is priced to be used as a simple, stand-alone cash register. From the many options available, you or your dealer can easily select just the 'smart' features that suit the way your business operates.

Alternatively, you can add Geller back office software either now or as your business grows. You can connect your PC directly to the SX-580 in-house if you have one shop, or by modem if you have more than one shop.

Displays

The 16-digit alphanumeric front and rear displays describe all items by name and give user-friendly prompts to servers to ease and speed service. The rear display can be raised and rotated to the best position for management and customer viewing.

Drop and Load Silent Printer with Graphic Logo

The SX-580's drop and load printer, with separate 57 mm thermal receipt and audit rolls, simplifies and speeds paper roll changes and eliminates the possibility of paper jams.

Your company logo or special design can be stored in the SX-580's memory and printed on each receipt.

There is no ribbon to replace or fade so receipts of the same exceptional clarity are produced every time. Your company logo or special design can be printed on each receipt.

Option of Low Cost Scanning

The SX-580's memory can hold up to 5,000 sales items as Price Look Ups. You can enter sales manually on the keyboard by registering the Price Look Up number. Or, you can scan bar coded items for high-speed sales. A range of low cost scanners is available for the SX-580.

Bar Code Learning

If you come across an unprogrammed item - even in the middle of a sale - 'Price' displays on the screen. After you enter the price and press the department, subsequent sales of the item will scan, showing the price and department name.

Bar code names and prices can also be entered via a PC.

Flash Memory and Data Back-up

The SX-580's programme is stored in non-volatile, flash memory. In the event of mains power loss, your sales data is protected for 30+ days. If required, you can back up your programme and sales data on a PC.

Powerful Reporting directly from the SX-580

Choice of twelve management reports provides the information you need to control your business. Eight Display Only reports (flash reporting) are also available.

Simple Back Office Reporting with Geller Software

Geller software offers a wide selection of management reporting. Customised Reports can be created to suit the individual needs of your business.

Authorised Sales and Support Dealer

SOME OF THE MANY IMPORTANT FEATURES
