

A smarter way to count cash

Tellermate TD is the simple, fast and accurate way to automate counting notes and coins. With voice support, TD talks you through your first count and ensures counting success thereafter. TD is simply smart cash control at the touch of a button.

A Smarter Way To Count Cash

- *No more errors*
- *Prepare your bank deposits*
- *No more double checking*
- *Remove excess cash during busy customer hours*
- *Conduct spot audits*

Simple

TD is easier to use than the average calculator. Simply switch it on and listen, while TD demonstrates how to count. With TD, you can count and total notes, loose coins and rolled coins with ease.

Fast

In just under a minute, TD counts cash that would take you at least 15 minutes to count by hand. That's 15 minutes you could spend doing something else – What else could you do today?

Accurate

TD is more accurate and reliable than counting by hand; therefore there is no need to double check. Used by banks and retail organisations around the world, no other counting device is more trusted.

What does TD do for you?

- Counts notes, loose coins and rolled coins
- Provides voice and visual commands for ease of use
- Creates accountability with itemised printer receipts
- Trains your new staff members through the embedded "tutorial"
- Travels easily – it's portable and lightweight

TD Accessories

TD comes with a coin scoop, standard power adaptor and two 'C' batteries.

Printers

Have cashiers sign printouts itemising the money they start and close out with. The TD printer provides a receipt showing total count by denomination.

TellerCups

If you have a cash drawer, take advantage of TellerCups. Simply place each of the cups into the cash drawer. To count the coins, remove the cup and place it straight onto TD. The coins are counted instantly!
