- ■ 100 PLUs privide for quick and accurate registration of popular items
- ■ Easy-to-Read Large Green LED display
- ■ Rotary mode switch for quick and easy operation
- ■ Removable key cap to customize description of keys

Highlighted Features

Powerful department functions with large key tops

The 130CR features four departments. Each department has a large, double-sized key and powerful, presettable functions such as "unit price up to 6 digits", "single item sales status", "high amount limit", and "negative department".

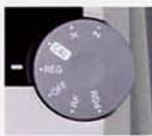

100 PLUs

100 items can be programmed into the unit price for quick and accurate registration. Linking to the department makes it possible to categorize selling items.

Rotary mode switch

Large rotary mode switch provides quick start up and switching to other operation modes.

Simple tax calculation

Add-in and Add-on tax system makes the whole tax operation simple and fast. Taxable status can be easily assigned to each department and PLUs.

Instant switchover to daylight-saving time

Time can be switched over to the daylight-saving time, and vise versa.

Calculator mode

The calculator mode allows the 130CR to become a calculator. Simply turn the mode switch to "CAL" and you can use it as a calculator.

Three ways to tender payment

Cash, charge and check payment media can be used, providing shoppers with the flexibility to meet their individual life styles.

Four types of reports

Four different types of reports are available to provide information on the sales. Financial report for a quick check of your sales during business hours, Periodic report for a specific period of sales, PLU report for 100 items and general control report for the departments and all other functions totalizers.

Variety of sales reports

General control Z(reset) report
